MISSION

It is Our Mission to responsibly provide high quality products and services through innovation, creativity and value. Our vision is to be recognized performance leader in the Energy, Petrochemical, Mining, Metal and Marine industry and to be a major distributor in local and global markets through our special services that enhance our ability to distinguish our products and services. Being a performance leader means we will achieve operational excellence. Industry-leading customer satisfaction, and superior financial performance. We sincerely believe in following a long-term commitment to staff development with support through opportunities from the top down. We have developed a sustainability mission for our company which can be briefed in three words (reduce-reuse-recycle); however, success will be measured by our clients preferring us because of their belief in our ability to meet or exceed their expectations of quality, service, and expertise. At TIES, we have always shown our commitment to safety, environment and society by recognizing and implementing good practice in encouraging a culture of responsibility in everything we do.

OUR VISION

Our vision is to achieve sustainable growth; we have established a vision with clear goals. Our goal is to become the largest exporter & distributors in our field which includes (Energy, Petrochemical, Mining, Metal and Marine industry).

VALUES

TIES defines its corporate values in its signature slogan 'Beyond Creativity'. We accept responsibility for our actions, and we make and support business decisions through experience and good judgment. We are dedicated to satisfying customer needs and honoring commitments that we have made to them. Our team is supportive of each other's efforts, loyal to one another, and care for each other both personally and professionally. TIES strives to help and improve community. At TIES we are concerned about the environment and promote the use of recyclable products and renewable energy. In another hand, we act with honesty and integrity.

All team members are encouraged to openly share their opinions and views. Last but not least, we treat our team members, customers, and suppliers with mutual respect and sensitivity, recognizing the importance of diversity.

Sustainability

Our vision of sustainability is based on how the corporate world-and our industry and company in particular-works within the larger social and natural world, and how the world is enriched or diminished by our products and services. As any company we have major impacts on society, and our overall business strategy reflects those impacts. We take into account the needs of society and of future generations.

Every decision made throughout the organization incorporates the emphasis on environmental, social, and economic prosperity to make our business adequate to the demands of an interdependent world.

Our focus on sustainability and the setting of clear goals for continual improvement is the key to our future success. We believing that it is the responsibility of everyone working within the company to behave in a manner consistent with our codes of conduct and policies to ensure we are an ethical and responsible business. We expect the same high standards across all our operations, so that we can make a positive impact wherever we are in the world.

QUALITY

As part of our strategic plan is to improve performance, compliance with applicable standards, and increase customer satisfaction with the company's products and services therefore the company has taken into its account to invest in quality department.

At TIES we have experts in testing a wide range of materials, components and products that they test and measure products on daily bases to assure that our product has the accuracy and compliance with standards. Moreover, we are also test our products by functional testing that it show whether the products meet customer expectations; however, our test scores yield information about problems and indicate areas where there is room for improvement.
